FUNERAL IN CLOVERDALE MAY BE READY SOON OTHER GRAINS NEED RAIN

The death of Clyde B. Broadstreet, ge 24, son of A. G. Broadstreet, of Cloverdale, manager of the A. G. Broadstreet & Son Implement Co., of Greencastle, occurred Monday night at o'clock in the Methodist Hospital in ndianapolis, following an operation for appendicitis on Sunday night. The ody will be taken to Cloverdale for

The death of Mr. Broadstreet comes s a great shock to his many friends in Putnam county. For many years he was associated with his father in the implement business in Cloverdale. About six months ago he came to Preencastle and established the Greenastle store of the A. G. Broadstreet Son company.

In his few months as a resident of reencastle he had established himself is a hustling young business man and is geniality and personality gained for im a large circle of business and so

The illness of the young man was f short duration. He was first taken ll while at work in his store on Fri lay afternoon but did not go to hi room until Friday evening. Saturday his condition was worse and after consultation between Dr. C. T. Zaring and Dr. W. W. Tucker it was de cided that an operation was the only lope of saving the young man's life His father was notified and, together with the young man's stepmother and sister. Miss Merle, came to Greencas

tle. Saturday evening the young man accompanied by his parents and sis er, and Dr. Zaring, was taken to the Methodist Hospital, in Indianapolis. Dr. Thomas Noble, the surgeon alled in the case, decided upon ar mmediate operation, which was per-

ormed at about 1 o'clock Sunday orning. Dr. Noble stated that the ase was one of the most critical he ad had to deal with in many months. On Monday the condition of Mr. Broadstreet was reported to be satisfactory but toward evening he became worse and death followed early Tuesday morning.

his afternoon on the Big Four train arriving here at 2:01 o'clock and was ransferred to the Monon station and aken to Cloverdale on the passenger rain leaving here at 2:41 o'clock. The uneral will be held at the Cloverdale emetery Wednesday afternoon at 3:30 clock. The B. P. O. Elks, No. 1077, of this city, of which the deceased was member, will attend the funeral in a body. Mr. Broadstreet was also a member of the Mason lodge at Cloverdale. All local people who do not have automobile or carriage accommodation will be able to reach Cloverdale in time for the funeral by going down on the 2:41 Monon.

Death of Mrs. Ellison.

The death of Mrs. Fields Ellison, ge 49, a well-known colored woman of this city, occurred at her home on Main street Tuesday morning at 6:30 o'clock. Her death was due to chronic Bright's disease, of which she had suffered for some time.

Mrs. Ellison had been in poor health last few weeks had her condition been serious. She is well-known in south Greencastle, having kept a grocery in that part of the city for several years. She leaves a husband to mourn

The funeral will be held at the Ellion home on Main street Wednesday evening car. afternoon at 2 o'clock. The interment will be in the Forest Hill cemetery.

Bloomington where he will take Chem- Tucker, Gobin and Genevieve Moore. of the next regular school year.

Putnam county farmers are now in Contrary to expectations, the plans and specifications for the proposed the midst of the wheat harvest Greencastle sewer system will not be The first of the fields were cut the ready for consideration by the city latter part of last week and by the end of this week the bulk of the wheat Announcement was made today by in this county will be in shocks.

City Engineer Alec Lane that the Reports from the different parts of plans are not yet completed and not the county show that this year's yield seems good. This is in spite of the cil. It is hoped, however, that the prediction made a short time ago by plans will be ready for the next some farmers to the effect that the council meeting to be held Tuesday, lack of rain had precluded any fine July 14. It may be possible to have crops. Farmers state today that not a them completed before that time, small amount of the grain will grade however. If this proves to be the No. 2.

case, then a special meeting of the The greatest anxiety over the wheat council could be called, at which the crop in the county, perhaps, was that expressed by growers in the vicinity of the National Road. One report a stated today that as far as they knew few days ago from that neighborhood there would be no business of import- had it that the crop was burned up ance to come up before the council at and that the small yield would be of poor quality. This report was denied today by at least two Greencastle men who own farms to the south. Former CHILD GETS HAND Treasurer Arthur Reat, whose farm i n the vicinity of Mt. Meridian, stated oday that he had seldom seen nicer wheat than that which he is cutting. AGAINST MILL SAW wheat than that which he is cutting.
The straw is tall and strong and the grain is of fine quality. Mr. Reat estimates that his wheat will average about thirty bushels to the acre. W P. Sackett, whose farm is on the Na-LITTLE SON OF MR. AND MRS. tional Road, confirmed the report of JAMES DILLINGER OF MADI- Mr. Reat. Mr. Sackett placed the SON TOWNSHIP MEETS WITH probable yield of his wheat at twen-SERIOUS ACCIDENT IN FATH-

ty-five bushels. Reports from practically ever other part of the county also show that the anxiety expressed earlier in the season over the probable failure of the wheat crop, will not be borne out by the actual yield. Where there is a MAY LOSE RIGHT HAND failure of the crop on a few farms, it has been caused in most cases by early planting that allowed the flies to get in some destructive work. One piece of wheat that has turned out this way has been found on the farm of Judge James P. Hughes and Curtis Hughes, about seven miles south of town. Only a part of this wheat will be cut as the flies have destroyed so ship, seven miles west of Greencas-The body was brought to this city tle, got his right hand against the much that it is not considered profit-

saw and it was almost cut in two. able to expend time in cutting it. Corn in the county is looking fairly well at this time but it needs rain The accident occurred at about 11 badly. Owing to the lack of spring rains the oats crop will be short.

BENSON AT CHICAGO

TO CONSIDER POSITION

DOG CROSSES SEA IN MUFF

Woman's Friends Ald Her in Concealing Pet When Search Is Made on Steamer.

New York-The principals in a little comedy which was a source of joy to the passengers of the steamer Amerika were Mrs. Grace V. Lloyd Clapper, of New York, Captain Schulke and Fi Fum, a nigh pedigreed Pekinese pup bought by Mrs. Clapper in London. Fi Fum is only eight inches long, but he created eight miles of trouble for the ship's

There is a rule at sea that all dogs be left in the care of the butcher in the baggage room, but Fi Fum's mistress decided that her precious should travel first class, and he came aboard inside a big sable muff. The second day out another passenger whose dog had been sent to the carof the butcher, told Captain Schulke there was a dog on board that was not playing the game according to

The commander investigated and remonstrated with the owner of Fi Fum. He finally intimated that he could not tolerate mutiny aboard his ship, even though committed by a charming young woman. Mrs. Clapper then held a secret conference with a score of friends,

While the captain made a tour of inspection, Fi Fum was passed from one to the other. For four days an ineffectual search was made. The day before the steamer arrived here, while the captain was in the palm room he turned to Mrs. Clapper, who was at the next table, and said:

"I'll get that dog before we land." He did not know Fi Fum was staring at him all the time out of the

'I didn't want to take any chance of losing the darling," said Mrs. Clapper on the pier.

"38" TAKES PLACE OF "23."

Slang Borrowed From Fortune Tellers Is the "Latest."

New York-Exit the slang expres sion "twenty-three." Enter "thirty-eight" as the "latest."

"Thirty-eight" was borrowed from the fortune tellers. In the slang i means "a sucker." It is a tag for the man who goes to a clairvoyan for tips on a horse race, for the gir who turns to the occult power have her love affairs straightened out, for those who rely on "hocus pocus" in matters of investment,

Cleaning

Cleaning Tatting

Soak the pieces in gasoline and while wet dust with cornstarch. Wrap them in a clean towel and leave for several hours. Beat the towel lightly, lift out the lace and shake it free from the starch. Press the picots into shape and iron lightly on the wrong side.

To Renew Leather

Wash well in warm water, but no soap. Apply dull black varnish and rub it in thoroughly while wet with a flannel cloth. Polish with a dry This restored a badly worn

Iron Rust

Boil a cupful of rice in two quarts of water for thirty minutes. Let it stand over night and strain through cheesecloth. Soak the iron rust spots in the rice water for four or five hours and rinse in clear water. This will remove iron rust of long

Iron holders made from a piece of asbestos the desired size and covered with drilling or heavy unbleached muslin are light and keep out heat. There should be a ring or loop to holder when not in use.

Beaded Waist

Put two cupfuls flour into one quart gasoline and stir well; leave he waist in this for a couple of hours; shake and stir around, but do not rub; give a second bath of clear gasoline; put a clean corset cover n a form or pillow, stretch waist this to dry; then brush with a oft brush to take out any remain ing flour. You will find your waist like new and the beads safe and bright. The seams only need press-

Melt a bar of white family soap in oiling hot water, pour in as much oan as you have clothes. Use plenty soap as it will not hurt lothes. Soak soiled clothes in warm water half an hour, wring out and drop in suds, then press lightly with wooden pounder, or I use a wire potato masher; let clothes remain in suds half hour; wring out suds and rinse thoroughly; put in light bluing water and dry.

Take the yolks of four eggs, two tablespoonfuls of flour, one-half cup-ful each of sugar and milk, four teaspoonfuls of salt, one teaspoonful of size of an egg, and two teaspoonfuls of mustard. Mix thoroughly and cook to the consistency of a boiled custard. In the meantime have on the stove cupful of good vinegar. Pour boil-ing vinegar into the custard, stirring constantly until thoroughly mixed. This will keep a month and is handy when company comes in unexpectedly. Thin it a little with either sweet or sour cream and add more sugar, salt or pepper according to the kind of material used for the body of the salad. It makes good chicken, lobster, shrimp, cabbage, lettuce, and potato salad and used with leftover scraps of boiled ham makes nice sandwiches.

Now that the days of house leaning are at hand see to it that he old wallpaper is removed and that the walls are thoroughly washd and made free from disease germs before refinishing. This is conceded to be absolutely necessary for the safeguarding of the public health, as epidemics have been traced to germs which had lingered in old wallpaper

Soft Ginger Bread

One-half cup of sugar, one cup of molasses, one-half cup of butter, one teaspoonful of ginger and one of cin-namon, two teaspoonfuls of soda dissolved in one cup of boiling water, two and one-half cups of flour, add to well beaten eggs last thing before

Corset Hint

When your corset steel breaks broken steel, on the inside, insert a steel taken from the side of an old corset. This strengthens the broken steel and does the same service as a

Coffee Moss

A little salt, as much thick sweet cream as will be necessary as a mix-ing element to go with enough flour

The vogue for bordered materials has brought out bordered voile in white. The designs are generally

CONSIDER THE CLOCK.

No Lock, No Language, and a Face Without a Feature.

Did you ever take time to consider the clock? You should have done so if you have not, seeing the clock gives you the time whenever you ask it. (No, this is no joke. It is a plain statement of fact.)

The clock is so sensitive that it constantly keeps its hands before its face. This is due to the fact that through no fault of its own it has been doing time for many years in the most public manner. It may be that as the face of the clock has no eyes, nor mouth, nor nose, nor chin, nor cheeks, nor any of the usual facial appurtenances, it keeps its hands over it to hide these defects. But this can scarcely be, we fancy, because its hands have no fingers nor thumbs, nor has it any arms, and any attempt to conceal one defect would only expose another.

Most clocks have only two hands, but many have three, and it is somewhat remarkable anatomically well as numerically, that the third hand is the second hand. It may also be remarked that the minute hand is not the minute hand, for it is longer than the hour hand.

The clock has neither feet nor legs, but it runs just the same. may be fast or slow, but it does not walk. It always runs, and it never runs up. It runs down unless it is kept running round. Providence wisely did not give feet to the clock The clock has a key, but no lock,

and for that reason even the most ignorant person never tries to open a clock with the key.

Some clocks strike and some do not, but no clock ever strikes with its hands. Just why a clock should be so peculiar is no affair of ours. (Of course this is no joke. striking of a clock may be an affair of hours, but it is not spelled the same way. We are not trying to be the sick funny. This is a dignified article. Remedies. Please do not interrupt us again.)

That passage in Scripture which By their works shall you know them." does not refer to clocks, but it might well have done so, because that is the way a good clock is known.

The clock speaks a universal language, and no matter whether it is a German clock, or French or Spanish or Italian, it can tell you the time just as distinctly as if it were plain Yankee.

The clock differs from all other human affairs in that while their operations end when they are wound up, the clocks' do not begin until they are wound up.

There are no clocks in heaven, because there is no time there. Neither is there any night, and an eight-day clock would not know when to stop San Francisco Call.

Hicks-You don't mean to say you got the better of Gabbie in an

argument? Wicks-Yes, I told him if he'd give me two minutes to present my side, without interruption, I'd let him talk an hour.

Hicks-Well? Wicks-Well, when I had talked through my two minutes I jum n a passing car.

Too Thin.

There is a Representative in Congress from the West who is exceedingly thin. Being a very good-natured man, this Representative always takes in good part any joking reference to his slenderness; indeed, he is not averse to a jest himself in that connection, as is illustrated by an incident that occurred in a street car in Washington.

It appears that just as the car was rounding a curve a burly citizen lurched forward and sat in the Congressman's lap. He recovered him-self quickly, and began a profuse apology, when he was interrupted by the Statesman's cheery that" al right.

"But,' added the Congressman plaintively, "I wish, my friend, that you'd tell me whether you thought f was painted on the seat."-Harper Weekly.

To Arms, Ye Brave! I question whether any man Along the street you strike Has failed to say that unto him All elbows look alike.

Might as Well.

-Baltimore Sun.

Pa Twaddles—Tommy, if you run away from school to-day and go fishing I'll certainly give you one of the worst thrashings you ever had.

Tommy Twaddles-Pa, would you just as soon give it to me now, so l won't have nothin' disagreeable to look forward to?- Cleveland Leader.

TARZAN OF THE APES

By EDGAR RICE **BURROUGHS**

Copyright, 1912, by the Frank A. Munsey Company

SYNOPSIS

The infant son of Lord and Lady Grey-stoke is mothered by Kala, an ape, after the death of his own parents.

The boy, called Tarzan by the apes, finds the skeletons of his parents in their cabin, but still thinks himself a white ape

Tarzan slays Kulonga in revenge for Kala's death and secures a bow and soned arrows from the native village.

He finds a photograph of his father and mother's locket. Worsting Kerchak battle, Tarzan becomes king of the

After subduing Terkoz, Tarzan leaves the tribe and terrorizes the savages in the village of Mbonga.

Clayton, Tarzan's cousin, Jane Porter and party arrive in a ship, the crew of which has mutinied.

Tarzan kilis a lion and saves Clayton's life. Jane Porter and her maid, Esmer-alda, are attacked by a tiger.

Tarzan breaks the tiger's neck, thereaves Professor Porter and his friend Ph!

Near the center of the clearing an not far from the drum, or altar, h commenced to dig. This was harde work than turning up the freshly ex cavated earth at the grave, but Tarzai of the apes was persevering, and so t kept at his labor until he was reward ed by seeing a hole sufficiently deep to receive the chest and effectually hide

Now the natural curiosity, which i as common to men as to apes, prompt ed Tarzan to open the chest and exam and massive iron bands buttled both his cunning and his immense strength was compelled to bury the chest without having his curiosity sat

way back to the vicinity of the cabin feeding as he went, it was quite dark. Within the little building a light was

burning, for Clayton had found an un opened tin of oil which had stood in tact for twenty years. The lamps als were still usable.

As Tarzan approached the windo nearest the door he saw that the cabin had been divided into two rooms by rough partition of boughs and sail

In the front room were the three men, the two older deep in argument while the younger, tilted back agains the wall on an improvised stool, wa deeply engrossed in reading one o

Tarzan was not particularly interest ed in the men, however, so be sough How beautiful her features! How de leate her snowy skin!

e was writing at Tarzan's own table beneath the window. Upon a pile of grasses at the far side of the room the negress, asleep.

For an hour Tarzan feasted his eye upon her while she wrote. He longed speak to her, but dared not attempt for he was convinced that she would not understand him, and he feared, too that he might frighten her away.

At length she arose, leaving her man uscript upon the table. She went to the bed upon which had been sprea rearranged. Then she extinguish ed the lamp, and all within the cabi was wrapped in Cimmerian darkness

Cautiously Tarzan intruded his hand between the meshes of the lattice unti his whole arm was within the cabin Carefully he felt upon the desk. A ast he grasped the paper upon which

She Was Writing at Tarzan's Own Table Beneath the Window.

vonderful writing which lay hidden in

wonderful writing which lay hidden in his quiver.

Hurriedly he brought it forth, hoping against hope that he could read what the beautiful white girl had written there the preceding evening.

At the first glace he suffered the bitterest disappointment of his whala its.

terest disappointment of his whole life. He was baffled by strange, uncouth characters the like of which he had never seen before. Why, they even he was been before. Why, they even he was baffled by a real line. Mr. Clayton lost and atdipped in the opposite direction from by all that he had ever examined either ar n printed books or the difficult script the few letters he had found.

For twenty minutes he pored over hem, when suddenly they commenced take familiar though distorted hapes. Ah, they were his old friends, ut badly crippled!

Then he began to make out a word aped for joy. He could read it, and

In another ! but for an exeptional word and again he found

Here is what he read:

Mr. Canler had asked for no security, and you know, dearle, what that will cannot meet them. In the second that was a second to the second that was a second that was

ars ago.

It was simply filled with gold coin and as so heavy that four men bent beneath

is weight.

The horrid thing seems to bring nothing ut murder and misfortune to those who ave to do with it, for three days after e salled from the Cape Verde islands our or crew mutinled and killed every one of

Jane Porter had been writing and withdrew his hand, holding the precious treasure.

Tarzan folded the sheets into a small of it.

They were going to kill us, too, but one They were going to kill us, too, but one of them, the leader, a man named Kins. Would not let them, and so they sailed south along the coast to a lonely spot where they found a good harbor, and here they have landed and left us.

parcel, which he tucked into the quiver with his arrows. Then he sped away into the jungle as softly and as noise lessly as a shadow.

CHAPTER XIII.

The Jungle Toil.

ARLY the following morning Tarzan awoke. and the first thought of the new day, as the last of yesterday, was of the last of yesterday, was of the sale away with the treasure today, but Mr. Clayton says they will meet with a fate similar to the mutineers of the ancient galleon, because King, the only man aboard who knew aught of navigation, was murdered on the beach by one of the men the day we landed. I wish you could know Mr. Clayton. He is the dearest fellow imaginable, and, unless I am mistaken, he has fallen very much in love with poor little me.

He is the only son of Lord Greystoke and some day will inherit the title and estates. In addition, he is wealthy in his

To Hazel Strong, Baltimore, Maryland. Tarzan sat in a brown study for

long time after he finished reading the letter. It was filled with so many new and wonderful things that his brain was in a whirl as he attempted to di So they did not know that he was

Tarzan of the apes. He would tell them shelter of leaves and boughs, beneath which, protected from the rain, he had the cabin. Among these were some

He took one, and beneath Jane Por ter's signature he wrote, "I am Tarzan He thought that would be sufficient.

Later be would return the letter to the zan, they had no need to worry-he would provide, and he did.

The next morning Jane Porter found her missing letter in the exact spot from which it had disappeared two nights before. She was mystified, but neath her signature she felt a chill run up her spine. She showed the letter. r rather the last sheet with the signa ure, to Clayton.

bing was probably watching me at makes me shudder just to think of it." "But he must be friendly," reas sured Clayton. "for he has returned you, and unless I am mistaken he left very substantial memento of his friendship outside the cabin door last night, for I just found the carcass of a

wild boar there as I came out." From then on scarcely a day passed that did not bring its offering of game or other food. Sometimes it was a young deer, again a quantity of strang cooked food, cassava cakes pilfered from the village of Mbonga, or a boat or leopard, and once a lion.

Tarzan derived the greatest pleasure of his life in hunting meat for thes strangers. It seemed to him that no pleasure on earth could compare aboring for the welfare and protection

of the beautiful white girl. Some day he would venture into the camp in daylight and talk with these people through the medium of the little bugs which were familiar to them and to Tarzan.

But he found it difficult to overcome the timidity of the wild thing of the forest, and so day followed day without seeing a fulfillment of his good intentions.

The party in the camp, emboldened by familiarity, wandered farther and farther into the jungle in search of nuts and fruit.

Scarcely a day passed that did not find Professor Porter straying in his preoccupied indifference toward the jaws of death. Mr. Samuel T. Philander, never what one might call robust, was worn to the shadow of a shadow through the ceaseless worry and men tal distraction resultant from his herculean efforts to safeguard the profes

A month passed. Tarzan had finally determined to visit the camp by day-

RICH SCIENTIFIC

In Excavating the Ancient City of Quari in New Mexico Science Profits

WAS AN OLD INDIAN SEITLEMENT

Ruins of Old Church Uncovered Built by the Spaniards in the 17th Century-To Be One of the Most Interesting Archaeological Finds.

Denver, Colo.-The School of American Archaeology at Santa Fe has been conducting extensive excavations on the site of the ancient Spanish mission at Quarai, N. M. and has secured unexpectedly rich scientific returns at the very outset of this important work. The ruins at Quarai have formed

an object of interest and speculation for many years. The walls of the old mission established by the Span iards early in the seventeenth cer tury are still standing. On ever hand are evidences of occupation long antedating the Spaniards Mounds show the existence of ruined nouses and kivas, and there has ex sted no doubt in the minds of scientists that Quarai was at one time the center of a large settlemen of Indians belonging to the Tiqua branch of the Pueblos.

The truth of this theory has been borne out by the preliminary ex eavations this fall. Further work i being rushed, and it is expected that when the work is completed Quarai will yield as rich scientific returns as the ruins of Tuvonvi and Puve xtensive Pueblo settlements in the Rio Grande Valley, which have been mpletely excavated by the School American Archaeology.

At Quarai a number of skeletons odies to be studied scientifically The Tiguas occupied a narrow strip zano Mountains, and at one time were a numerous and powerful tribe out are believed to have been al most completely exterminated by the Apache Indians. The site of the ncient Indian town has been mapped and shows that there were at leas fifteen terraced houses, arranged in series of quadrangles. Many un derground kivas, or sanctuaries, have been located, and all these will be cleared of the accumulated rubbish

Even more interesting than the In dian town is the extensive Spanish ecclesiastical institution which has been uncovered. It has been founthat the Spaniards built more es tensively on the site of Quarai than was at first supposed. The ruins of of public interest for many years but these formed only a part of th buildings erected by the Spaniards who must have converted Quarai in o an important headquarters. Ad joining the church have been dis covered the foundations of building and mission school. The settlemen was surrounded by a massive stonwall and there were inner fortifies ions defending certain pueblos.

Quarai is located near the Nev Mexico summer resort of Mountain air and was owned by Messrs. Duhlavy, McCoy & Corbett of that place Recently the owners presented the site of the ancient city to the School of American Archaeology at Santa Fe. to be excavated and exhibited as a public archaeological park. Di rector Edgar L. Hewett immediately began the work of excavation and estoration, which promises to be the most extensive and important work of the kind carried out in this country. It will take several seasons to uncover the ancient Indian city and the Spanish settlement thereon but rich scientific rewards are looked

The destruction of Quarai and other pueblos of the Salines becam inevitable as soon as the Apache spread in that direction, which they have begun to do previous to the advent of the white man in the Southwest. When the Pueblos had received from the Spaniards new domestic animals, the inducement for the nomads to prey upon the house dwelling Indians was greatly in creased. Only the rapid coloniza tion of New Mexico could have saved the villages on the east side of the Manzano chain. This was im possible, as Spain was too weak and New Mexico not sufficiently inviting to warrant extraordinary exertions.

Quarai was the seat of a Spanish mission from 1629, and contained monastery and church dedicated to the Immaculate conception. Accord ing to Vetancourt, Quarai had 600 inhabitants immediately prior to its abandonment. About 1674 the Apaches compelled the Quarai people to fly to the pueblo of Tajique, about twelve remained inhabited probably a year onger, when its occupants were also preed to succumb to the hostility o the Apache and to flee to El Paso being afterward settled in the village of Isleta del Suir, farther down the Rio Grande, where their descendreside today.

RETURNS SECURED DAIRY AND TO SECURED

THE SEPARATOR A NECESSIT

Several Cardinal Reasons Why One is Needed on Every Farm There are several cardinal reason

why the separator is needed on over farm where cows are kept: 1.—It saves lots of time over the old method of raising the cream. 2.—It saves work, as there are no jars or pans to fuss with and wash. 3.-It is easier to carry the cream to the creamery two or three times a week than it is to send a wagon load of milk cans each day. 4.-It saves money in the amount of extra cream which is obtained. 5.—The warm skim milk is better for the stock, whether it is calves or pigs. Statistics show that the feeding value of separator skim-ming is from 20 cents to 40 cents per hundred-weight. Therefore, by feeding it to the young stock with a little oil cake, they will get fatter than they did by the old method, and with separator skim milk they escape the sickness that comes from the gravity milk. 6.—The cream from the separator makes better butter than that which is raised by the old pan methods. It is a well-known fact that butter fat with impurities in it will not make as good butter as butter fat with the impurities taken out. The separator removes all these natural impurities. 7.—There is more money in it all around where the farmer uses a separator, for he gets more cream. better cream, hence makes higher grade butter, and gets better returns from his stock because of the fresh skim milk which is fed.

STOPS COW MILKING HERSELF.

Contrivance Arranged That Will Save

Dairyman Many Pounds of Butter. The following instructions are given n answer to an inquiry regarding a evice to prevent a cow from sucking

"Securing two lengths of small cord also six pieces of round, light wood about 12 inches long and 1 1-2 inches n diameter, I bored 3-8 inch holes at each end of the sticks, then having tied a knot at one end of the rope, I threaded on the sticks. Not having shorter pieces of wood, I bored through the center likewise to thread

between the longer sticks. I knotted the cord on either side of the sticks then throwing the same across the cow's neck (having regulated the knots and sticks to suit the small of the neck and also the shoulder), I tied he ends of the cords around the first knot. The accompanying illustra ion shows the result. This device prevents the cow from reaching her lanks and in my case has stopped the failing and will save quite a few pounds of butter."

Intensive Dairy Farming. The question is often asked how nany cows a certain number of acres will support. By the energy of the for the dairy cow. A farm in a good state of fertility can be easily arranged so that one could keep a cow to every two acres if the land is all good, rich, tillable land. And one would be able to raise both the forge or bulky part of the ration, and the grain ration, too. It could be done n a few years' time with the proper

andling of the herd on the farm Three crops upon the farm will do t-first, corn; second, clover hay nd, third, peas and oats. Of course, the clover sod would be plowed down or corn and then the corn ground be out into peas and oats the following season. With these three foods one an make a balanced ration for the dairy cow without purchasing any other outside food, either concentrated or bulky.

The statement has often been made hat an acre of good land will support cow the year round. One dairyman made the remark that he could keep two cows on an acre, but practically the man who keeps one cow on two icres is doing very good business if he gets fair prices for the product. It s a fact that the demand for milk butter and cheese is increasing fast er than cows and that prices are continually advancing. There is no better business than dairying.

The Feed of Colts and Calves.

It is a mistake to allow the colts and calves to go onto pasture skin pure. Keep them in good flesh with nay and grain foods. Corn and clover hay are about the best feeds for these young animals, and they will eat them all the year round. Dry clover hay is relished by all cattle and horses, even when on good summer ants, almost completely Mexicanized, pasture, and it is a good thing to reside today.

HARRY MAXWELL. (All Kinds of Life, Accident: and Health Insurance.)

The trial of Abraham McCammack of Belle Union, who is charged with assault with intent to murder a Brazil woman, which was set for today was continued for one week. The condition of Mrs. Spriggs, who was attacked by McCammack, was such today that she was unable to attend court. Jackson Boyd, attorney for McCammack, was in Brazil today.

Card of Thanks.

We want to thank our city firemer for their quick and efficient work in handling one of the most stubborn of fires, thereby saving our home for us. Also we thank Robert Hanna, Virgil Grimes, William Bolton, Jack Bridges and scores of friends for their assistance and sympathy.

C. C. Leachman and Family.

SLEEPING OUTDOORS.

Appeals to the Imagination, but Has Its Drawbacks.

Sleeping outdoors is a practice about which there is no such thing as a lukewarm opinion. Either a person thinks there is nothing like it or he couldn't be hired to do it. The author of "Lorna Doone" states that a horse sleeps best in a closed barn, and a good many people are like that, What with the croaking of frogs, and the chirping of wakeful birds and the rustling of the trees, and other sounds that nothing but a belief in ghosts can explain, night out in the open is ot, in the opinion of such people, all it's cracked up to be.

All the same, there's something at ractive in the notion of being oxidized while one sleeps, and nowadays there are so many stories going about of people who were cured of whatever ailed them by sleeping out of doors that it seems worth trying. One middle-aged woman who has just made a great hit with a novel-her first-at tributes her success to inspiration gained by sleeping out of doors. She has a cot on an open porch at her home, up the Hudson, and there she sleeps in all weathers. The porch has a roof, and screens to be drawn when chip, and will move to the place, from it rains, but save in hard storms she never draws them.

"When I slept indoors," she says, 'I used so often to get up in the morning feeling heavy and logy-perfectly idealess. It never entered my head to write a book in those days I always had my bedroom windows open, but anybody who has slept out of doors will tell you that no matter how wide your windows are opened it isn't the same thing at all.

"I hadn't been using my porch bed a month before my brain began to wake up, and I'm firmly convinced that the fresh night air wrote my book. As for physical health, from a bundle of bones I've become a creature bursting with riotous health."

But even a porch bedroom has its limitations. Some people can't feel that they are sleeping out of doors unless they have the sky above them. There is something inexpressibly

beautiful and calming about it. To secure this, along with adequate protection from the weather, a specially constructed outdoor room is necessary. In a certain yard near a certain American city, under some big sycamores, is an outdoor sleeping room which seems almost ideal. The floor is raised two feet above the ground, to guard against dampness and there is a wainscoting three feet But the great feature is the roof, which, except for a cap of wood on either side of the ridge pole, is of glass-ordinary greenhouse sashes so fitted that they slide up and down the rafters, being operated by sash is fair they are drawn up under the wood cap, and the sleepers' faces are open to the sky. Even when it storms the view is not interfered with, and the people who occupy that sleeping house say it is perfectly delightful to lie and watch the rain beating upon the glass and the trees tossing their arms above. The projecting eaves keep any ordinary rain from beating in at the sides, but to guard against emergencies there are heavy curtains of duck which may be drawn and fastened down at the bottom if the

Robber Bees.

It is where two colonies sitting side by side are at full flight at the same time that mixing of bees comes

about. After setting out it sometimes hap pens, especially if the weather is very warm, that the first set out will commence to rob or carry off the stores of those set out last, which are so busy with their cleansing flights they they do not seem to notice the

Robbing is not always confined to uch colonies, but all weak colonies, whether wintered in the cellar or otherwise, are subejct to be attacked in the spring.

Industry of the Bee.

The bee is famed for industry, but to show how much work the bee really does a naturalist says that to collect a pound of clover honey the bees must deprive 62,000 clover blossoms of their sweetness. To do this the 62,000 flowers must be visited by 3.750,000 bees, or, in other words, to collect his pound of honey one bee nust make 3,750,000 trips to and from the hive. As bees are known to fly for miles in their quest of suitable fields of operation, it is clear that a single ounce of honey represents milions of ailles of travel.

IS CONTINUED FOR ONE WEEK. BAINBRIDGE WILL HAVE LIGHT SOON

TOWN BOARD HAS LET CON-BUTING STATION TO COST \$2,800-PLANT WILL BE COM-FURNISH POWER.

THE BOND ISSUE IS SOLD

By September 1 Bainbridge will have electric lights and electric power. The power and light will be furnished Bainbridge by the Roachdale Light & Power Co. Work at building a \$2,800 distributing station in Bainbridge will be begun at once and it is hoped to have the plant completed and the serv-

ice ready by early this fall. A contract to furnish power to ompany several weeks ago. Under the contract, Bainbridge is to build its own distributing plant, which is the same as an interurban sub-station. In order to build this it was necessary to ssue bonds to the amount of \$2,800 The bonds have been issued and sold.

On Monday the Bainbridge town oard met and let a contract for the naterials and supplies for the distributing plant and for the building of the plant. The Varney Electrical Co., of Indianapolis secured the contract for furnishing the materials and the Roachdale Light & Power Co., will do the work.

The Roachdale company now is uilding a new \$18,000 power plant. When the plant is completed an entire new set of equipment will be installed.

HARLEY REEL WILL BE THE POSTMASTER AT REELSVILLE

The announcement has been made praised of his appointment this mornnorning paper. There were several applications for the appointment, examination, as required in offices of this evening. he class of that in Reelsville.

ST. LOUIS TO GREENCASTLE

ON MOTORCYCLE IN 71/2 HOURS From Greencastle to St. Louis by rain is 200 miles. By the National Road it is 235. It takes a train nearly six hours to make the trip, so Leslie Vandament, local motorcyclist, feels that he made pretty good time when ne covered the distance from St. Louis o Greencastle in just seven and onehalf hours. Owing to the fact that there had been no rain for some time, the dirt roads of Illinois were covered with over half a foot of dust, which surprise some people to learn that it namville. took only three gallons of gasoline to nake the trip.

HENDRICKS FUNERAL HELD

The funeral of James Hendricks. whose death occurred at the home of his mother in Putnamville Monday morning, was held at the Methodist church at that town this morning at 10 o'clock. The interment was in the Putnamville cemetery. Mr. Hendricks suffered an injury to

his hand several days ago and an at-tack of lockjaw followed which re-sulted in his death. In an attempt in Martinsville. to save his life one finger was amputated from the injured member but he was not benefitted by the operation. Mr. Hendricks was one of the best made difficult riding at times. It may known farmers in the vicinity of Put-

> Three new mahogany desks are being installed in the office of F. C. Tilden, librarian of DePauw university. The new furniture was purchased with the funds derived from fines and the sale of old books.

Professor N. W. Barnes, head of the department of English Composition at DePauw, will leave Thursday for Bloomington to begin his work in the summer school of Indiana university. Prof. Barnes has been chosen by the officials of the state institution to have charge of two classes in English in the annual summer session. One course will be in advanced composition while the other will be in the teaching of English.

Prof. Barnes' work at Indiana will only require part of his time. He will be in Greencastle over week-ends until July 31. At that time he and Mrs. Barnes will leave for a trip through northern Michigan. Prof. Barnes has not announced his plans for the next school year but it is known that he will be away from De-Pauw on a year's leave of absence. The work in the English department

of DePauw next year will be under the direction of Professor Nicholson, Miss-Margaret Keiper will return to continue her work with the freshman composition classes. Miss Ruby Scott, the national convention of the Alpha charge of some beginning classes. A

ADVERTISE IN THE HERALD. Niagara Falls.

*********** VOICE OF THE PEOPLE.

Editor The Herald: Is it possible in an educational city like Greencastle, that the rights of honor of her sister, Mrs. Helen the people shall be denied? I am not Forsyth, of Paris, Ky., and her niece, in favor of the high school building that is now under discussion. But bedays. The time before and after the fore I demonstrated any outward feeling in regard to the method of building and hardships that it would involve on me and others similar to myself, I circulated a petition in my own ward and in so doing demonstrated not only to myself, but to all others who are likely to be fair with us, that the majority of the property holders are not in favor of a high school building at this time. I interviewed one hundred and twenty-eight hundred and twenty-eight tax paying people if sixty-five had been in favor of the building, I would have changed my course by keeping silent, but the majority of the people are with me and my government and with them I shall stand. I have been told that the school trustees in Greencastle have a right to build this Bainbridge was made by the town J. B. Nelson, Mrs. O. F. Overstreet, it may not be true. But how are you building. This may be true and going to separate the trustees from the people and allow them to enchant service belongs to the people, without

first consulting the people? It is not advisable to take the adantage of a bad law to excuse ourselves. We can vote on this question next November without much extra ost and without breaking any law Miss Anna Cannon is visiting her | The law doesn't say that the people sister, Theresa Marie, at St. Mary's- shall not vote on a question they are interested in. Some people may say, why is it that Mahan is so aggressive Harry Hays was in Indianapolis on in this matter? First, we can get along without a building at this time; second, with the taxes we have and n addition the sewer and high school City. building with the high cost of living our homes are threatened. How many of you in Greencastle that know recently, two poor old gray-headed people, one white and a widow, the other black, that have lost their homes, a

life-time saving, by over taxation? It is not the best to sit on a brussels rug with your feet under a mahogany table and dictate to common SPENCER MAHAN.
